RE: THE PROGRESSIVE PROGRAMMING FACILITY AT CSP-LAC

Dear Secretary Cate:

I am a family member of a prisoner serving time on the Progressive Programming Facility at CSP-LAC who will be transferred to a less well functioning Level III prison due to the recently enacted classification and placement rules changes.

I believe that it's a mistake to break up the group of men who built the program up, which would result in more than half of the facility being transferred far from their families, as well as incur unnecessary costs to the taxpayers.

It is my belief that programs like the Progressive Programming Facility should be the future of the prison system. Damaging the program for the sake of shifting bodies around seems both shortsighted and unfair to those who have done the right thing.

I ask you to overrule the decision to order these mass transfers and allow successful participation in the Progressive Programming Facility to be a justification for continued placement at CSP-LAC, regardless of placement or classification score.

Thank you for your consideration.

Sincerely,

cc: Friends & Families for the Honor Program
